

OPPORTUNITIES FOR NAVAL ARCHITECTS AND MARINE ENGINEERS

Foreship is a well known and highly respected ship design and engineering company providing a broad range of services to the shipping industry. Our offices in Helsinki and Kaarina have more than 40 naval architects, marine & structural engineers and interior & HVAC designers. More information at www.foreship.com. As we are expanding our business we are now recruiting more personnel:

- 1. Project Engineers for concept, project and conversion design tasks in our Competence Centre.** Requirements include a bachelor or master's degree, preferably in Naval Architecture. We will consider applicants with good references in final stages of study. Applicants should also be willing to learn the required basic skills such as escape arrangements, fire protection, structural principles and stability.
- 2. AC-engineers for newbuilding and conversion design projects in our HVAC department.** We are looking for professionals from the corresponding areas, including minimum 3 years experience of similar system designs and related calculations. Experience of other HVAC disciplines will be considered as benefit.
- 3. Project Engineers for structural concept and basic design tasks in our Hull department.** We require a bachelor or master's degree in naval architecture or comparable qualification. Experience in hull structures (basic design, structural analysis or classification) would be appreciated. Applicants in final stages of study, with good references, will also be considered.
- 4. Machinery Engineers for project and basic design tasks in our Machinery and Deck Department.** Requirements include applicable engineering degree and minimum of 3 years experience. We will also consider graduates with good references and will to learn.

All positions require good communication skills both oral and written, and a willingness to travel. You will also interact well with clients, management and project teams.
